Missouri Department of Social Services Mission Statement

To maintain or improve the quality of life for the people of the state of Missouri by providing the best possible services to the public, with respect, responsiveness and accountability, which will enable individuals and families to better fulfill their potential.

Children's Division Mission Statement

To partner with families and communities to protect children from abuse and neglect and to assure safety, permanency and well being for Missouri's children.

Early Childhood and Prevention Services Mission Statement

To provide leadership and resources toward the development of a coordinated early learning system so that all Missouri children can succeed in school and life.

METHODOLOGY

The Purpose

The United States Department of Health and Human Services requires state agencies that administer Childcare Block Grant Funds to collect information on childcare market rates. To meet this requirement, the Research and Data Analysis Unit of the Missouri Department of Social Services (DSS), on behalf of Early Childhood and Prevention Services Section of the Children's Division, conducts a survey biannually that contains information about rates, as well as subsidized payment issues and other statistics.

The Sample

The Missouri Department of Health and Senior Services, which is responsible for licensing childcare facilities, provided a list of all licensed facilities. Surveys were made available online to 3,323 providers. Providers were notified by multiple email messages as well as a message on the online invoicing system. A total of 121 surveys were completed. All surveys returned were able to be used with only one outlier needing clarification.

The Survey

The survey covered the following topics:

- rates charged for care differentiated by age groups (Infant, Preschool, and School Age¹), type of facility (Family, Group, or Center), category (full-day, half-day, or part-day²), and whether care was provided during daytime/weekday hours or evening/weekend hours;
- the number of children cared for in each age group, type of facility, and category;
- whether or not the provider is accredited;
- whether or not the provider accepts state subsidy payments; and
- Family Support Division (FSD) performance with respect to prompt and accurate payment for children receiving state subsidy.

¹ Infant is defined as under 2 years old; Preschool is 2 to 5 years old; and School Age is over 5 years.

² Full-day is 5 or more hours; half-day is 3 to 5 hours; and part-day is less than 3 hours.

Data Cleansing

Providers were asked to report rates in full-day, half-day, and part-day increments, as well as the frequency of the rates (example, hourly, daily, weekly, biweekly). All rates were converted to a daily rate using the following formulas:

- Hourly rates multiplied by 7.5 hours for full day, 4 hours for half day, and 2 hours for part day care
- Monthly rates divided by 22 days
- Weekly rates divided by 5 days
- Biweekly rates divided by 10 days

Rates were checked for reasonableness in light of the type of care provided and the area of the state in which the care was provided.

Determining Market Rates

Surveys returned with no rate for a given category of care had no influence on calculating rate information for that type of care. Because of this, the total number of surveys for each type of care and classification varies depending on the number of providers that reported a rate for that type of care.

Caution should be used in interpreting results where there are few responses in a given geographical area or for a certain type of care. This is especially true with respect to Group Homes. Also, keep in mind that voluntary participation introduces the potential for self-selection bias. With respect to this particular survey, providers charging more than DSS rates may have a perceived incentive to return the survey in the hope of influencing state paid rates. Providers charging below or close to the DSS rates may be more satisfied and, therefore, have less incentive to respond. In addition, only licensed providers were surveyed. It is uncertain how the inclusion of unlicensed providers may have affected the results.
